

Heidy Viviana Cardenas Soler

PRODUCT & USER EXPERIENCE DESIGNER
SOFTWARE ENGINEERING STUDENT

About me

Software analyst and developer, currently a software engineering student with experience in interface design and project management. I am proficient in tools such as Figma for creating user experience-focused flows and prototypes, and I use WordPress for web development. I also have basic video editing skills, which complement my ability to create visual and multimedia content.

I excel at being organized, proactive, and solution-oriented, always striving to improve the interaction between the product and the end user. My experience collaborating with clients and managing projects allows me to better understand their needs and offer innovative solutions.
